| | |
|---|----------------------------|
| Full Stack Developer, Maharishi Markandeshwar University | Feb 2020 - Jun 2020 |
|---|----------------------------|

PROJECTS

| |
|--|
| <p>Event Management HUB - eventmanagement2315.000webhostapp.com Mar 2020 - Jun 2020</p> <p>Past three years in university we have observed some flaws in event organization system in our college. Which led us to an idea through which these errors can be minimized. So, we decided to make a web portal where organizers will have authority to create an event and post. Later they will also be able to edit and delete the event. Organizers will also get the automatically generated reports which will help them analyse the participation, interests and payments.</p> <p>Advanced calculator with error terms - na Jul 2018 - Dec 2018</p> <p>In this individual project, users can perform basic mathematical operations with or without error terms with FSM-based user-friendly errors and can get result up to 25 digits using user-defined uNumber Library. Users can also make and store variables to use them. Some other functions are: solving the equation according to BODMAS rule, storing the result in text format and unit conversions.</p> <p>Technology stack: Java, JavaFx Role: Java Software Developer</p> <p>Personal-Knowledge-Management-Tool-JAVA - Na Jul 2018 - Dec 2018</p> <p>In this individual project, user can load his addresses and perform search and CRUD operations on it, user can make use of the dictionary, search the words, add dictionary items etc., user can also make a to-do list and perform CRUD operations on it, user can also use the notes feature to make notes. This program make use of a user predefined API for CRUD operations.</p> <p>Technology stack: Java, JavaFx Role: Java Software Developer</p> |
